EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Douglas L. Weller on Wednesday May 26, 2010 at 4:30 pm (EST).

In the interview Examiner Washburn pointed out that claim 19 is considered nonstatutory, as it describes a 'computer program comprising program instructions embodied on a computer readable medium' and Applicant's spec, at page 4, second paragraph, fails to define computer readable media such that it only encompasses statutory subject matter. Examiner Washburn recommended amending claim 19 such that it describes a, 'computer program comprising program instructions embodied on a non-transitory computer readable medium', which ensures that claim 19 is directed to only statutory subject matter while not adding new matter into the claim (see the attached 101 memo). Attorney Weller agreed to the changes.

The application has been amended as follows:

Claim 19 (only lines 1-3):

19. A computer program comprising program instructions embodied on a non-transitory computer readable medium that, when loaded onto a computer, cause the computer to process data by:

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant's arguments, see pages 9-10, filed 11/24/09, with respect to claims 1-4, 6, 8-11, 13, 14, and 28-30 have been fully considered and are persuasive. The 103(a) of claims 1-4, 6, 8-11, 13, 14, and 28-30 has been withdrawn.

A relevant piece of prior art, Hussam (US 2003/0050927), describes a system and method for generating an RDF graph, where the RDF graph includes at least one blank node (see 0093-0101). However, Hussam fails to disclose ordering the RDF graph, labeling some of the blank nodes based on a limited examination around each blank node, labeling other blank nodes that can't be labeled based on the limited examination around each blank node, and then reordering the RDF graph in order to produce a canonical representation of the RDF graph.

Another relevant piece of prior art, Ryall et al. (US 6,774,899), describes a system that enables a user to order a graph, enables a user to apply labels to the graph, and then enables a user to order the graph again using one or more visual organization features (VOFs), as disclosed at 3:14-4:21 and 5:17-40. However, Ryall fails to disclose generating and ordering an RDF graph, where the RDF graph includes blank nodes, labeling some of the blank nodes based on a limited examination around each blank node, labeling other blank nodes that can't be labeled based on the limited examination around each blank node, and then reordering the RDF graph in order to produce a canonical representation of the RDF graph.

A further piece of relevant prior art, O'Neil et al. (US 6,889,226), describes adding hierarchical position identifiers (labels) to nodes in a tree graph, where the hierarchical position identifiers clearly illustrate the relationships among nodes (e.g., child node, parent node, sibling node, etc), as disclosed at 6:48-7:43 and 8:53-9:38. However, O'Neil fails to disclose generating and ordering an RDF graph, where the RDF graph includes blank nodes, labeling some of the blank nodes based on a limited examination around each blank node, labeling other blank nodes that can't be labeled based on the limited examination around each blank node, and then reordering the RDF graph in order to produce a canonical representation of the RDF graph.

Accordingly, the prior art fails to disclose or reasonably suggest at least the limitations found in independent claims 1 and 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL WASHBURN whose telephone number is (571)272-5551. The examiner can normally be reached on 9:30 A.M. to 6 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ulka Chauhan can be reached on 571-272-7782. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
